

DTS Customer Case Study

Cognos Reports Development

Need:

A national leader in healthcare quality improvement and medical reviewer based in Michigan needed to improve their data extraction and report generation processes.

Solution:

Digital Technology Solutions provided Cognos reporting services to generate monthly reports to submit to Center for Medicaid and Medicare Services. DTS staff developed several complex Financial and HR reports using Cognos Impromptu report writing tool. Our team reviewed existing client reports and developed improved report and catalog structures. Our staff validated the data in the reports and trained users on using these reports. Finally, we developed an interface to transfer payroll information to a third party 401k administrator.

Benefits:

Significantly reduced the time to generate required monthly reports and enhanced the knowledge of the staff on the processes to extract and create adhoc reports.
