

Program/Project Management

Whether you want to set up a “clinic” to coach your project managers, or need help in setting up your project management infrastructure or program office, DTS can provide the expert advice you’re looking for. DTS’s comprehensive approach to organizational challenges - strategy, people, processes and technology - combined with our public and private sector experience has made us a leader in information technology and program/project management services.

Our services include:

➤ Strategic Program/Project Management Consulting

Project Coaching
Project Auditing & Recovery
Portfolio Management

➤ Project Infrastructure Development

Process Development
Tool Selection
Organizational Structure

Information Security Assurance

Are you concerned about your network vulnerability in the current virus and hacker prone world? Are you compliant with required regulations? DTS has solutions for your Network Infrastructure and Security challenges. DTS can assist whether you want to redesign or upgrade your network infrastructure. Our professional staff includes experienced consultants each with five to ten years experience in the Design, Administration and Support of Network, Server and Security Infrastructure. DTS consultants have extensive industry experience as well as certifications such as CISSP, CISA and others.

Our services include:

- Information Security Assessment and Audit
- Regulatory Compliance (SOX, PCI, FISMA, GLBA, BSA)
- Security Infrastructure Design & Implementation (Firewall, IDS, Anti-Virus and Anti-Spam)
- Disaster Recovery and Business Continuity Planning
- Identity and Access Management (Single Sign-on, Remote Access, VPN)
- Network Design, Administration and Support (LAN/WAN/VLAN, Server, Desktop)

Digital Technology Solutions(DTS) is a growing Information Technology services provider. DTS is a Michigan Minority Business Development Council (MMBDC) certified Minority Business Enterprise (MBE). DTS is also certified for participation in the US Small Business Administration (SBA) 8(a) Program. DTS is headquartered in Detroit, MI with an operating location in Dayton, OH. DTS consultants have extensive 'hands-on' experience in successfully designing and implementing complex, mission critical systems.

Global competition is changing the way companies operate and forcing them to utilize technology to streamline processes and reduce costs. Whether you are looking to automate your processes, facilitate data sharing, or develop new systems - our team can help you. DTS "Customer-Centric" partnership approach enables us to deliver superior solutions tailored to your unique needs.

Our systems approach and extensive knowledge of various technologies enable us to deliver end-to-end solutions seamless to the end-users. The DTS approach places significant emphasis on business processes, functional specifications and user interaction using the right tools for the job rather than focusing on technology. This approach leads us to delivering higher quality solutions cost-effectively exceeding customer expectations.

DTS staff members have advanced degrees and extensive Information Technology expertise with industry specific application knowledge. We have significant experience in the Healthcare, Financial, Government, Automotive and Manufacturing sectors.

Our systems integration expertise combined with Web, Database and Network technologies knowledge allows DTS to provide solutions to meet your short and long term business needs. DTS provides IT Contract Staffing, Application Development/Integration, Program/Project Management, Information Security Assurance and Business Process Outsourcing Services.

Our Services

IT Contract Staffing

DTS Staffing service gives you the flexibility to access the skills as you need them and to effectively respond to change as it happens. Whether you are looking to temporarily augment your project team or hire permanently, DTS can provide you highly qualified resources at very cost-effective rates. DTS has refined our recruiting processes based on years of experience to ensure that we match the right talent to your needs.

DTS consultants have an average 8-10 years of industry experience performing the consulting services for large multinational companies and Government entities. DTS cultivates relationships with the best talent available locally. Our consultants possess not only required technical skills but also specific industry domain knowledge.

DTS can provide staff in the following categories:

Project Managers	- PMP Certified
Business Analysts	- Specific industry knowledge
Developers	- Java, .NET, VB, C++, Domino
Data Integrators	- Informatica, Cognos, BO
Database Administrators	- Oracle, SQL Server, DB2
Network Security Analysts	- Checkpoint, Pix, CISSP, CISA
System Administrators	- Windows, Novell, Unix, Linux

Application Development / Integration

DTS staff has significant experience providing Application Development and Integration services in Client/Server and Web environments. DTS can either work as part of your project team or can take complete responsibility from Concept to Implementation. DTS consultants have developed several complex, mission critical systems for various Fortune 500 clients over the last 15 years.

DTS implemented several e-Commerce, Business Intelligence, Document Management/Imaging, and Workflow solutions to our clients. We have expertise in integrating disparate systems creating a seamless enterprise and visibility to senior management.

DTS can provide these services in On-site, Near-site and Offshore models leveraging our ISO 9001:2000 certified Offshore development center in India.
